Career Objective

Aspiring Data Analyst with hands-on experience in data analysis, visualization and sentiment analysis using Python and BI tools. Seeking an entry-level role to apply analytical skills and contribute to data-driven decision-making.

Education

Parul University, MCA (Specialization in Big Data Analytics) 2024-2026

- CGPA: 7.94 /10

Charusat University, BCA 2020-2023

- CGPA: 6.94/10

Experience

Data Analytics Intern ULANS | Vadodara Jan 2026 – April 2026

- Analyzed datasets using **Python (Pandas, NumPy) and SQL** to extract meaningful insights
- Performed **data cleaning and exploratory data analysis (EDA)** to identify trends
- Developed **interactive dashboards** to track KPIs and support decision-making
- Automated data processing tasks to improve efficiency

Data Science & Analytics Intern Future Interns | Remote Nov 2025 – Dec 2025

- Completed a project-based internship involving data cleaning, exploratory data analysis (EDA), visualization, and sentiment analysis using Python.
- Worked on real-world datasets across e-commerce sales, social media campaign performance, and college event feedback analysis
- Created insights using Python (Pandas, Plotly, TextBlob) and BI dashboards.

Project

AeroInsight – Airline Pricing Analysis - [Link](#)

- Developed an interactive Power BI dashboard to analyze **300K+ flight records** and uncover airline ticket pricing trends across major Indian airlines.
- Analyzed key metrics including **average ticket price (₹20,890), flight duration, airline performance, and city-wise flight distribution**.
- Created visualizations such as **KPI cards, bar charts, scatter plots, line charts, and interactive filters** to identify pricing patterns and booking trends.
- Performed **data cleaning, data modeling, and DAX calculations** to transform raw airline data into actionable business insights.
- Identified trends in **airline pricing, flight class distribution, and departure city traffic**, supporting data-driven decision-making.

Mobile Sales Dashboard - [Link](#)

- Developed an interactive Power BI dashboard to analyze **769M+ sales revenue, 19K units sold, and 4K transactions** across multiple cities and mobile brands.
- Created visualizations for **city-wise sales performance, monthly trends, brand comparison, payment methods, customer ratings, and product performance**.
- Utilized **DAX, data modelling, and data visualization techniques** to generate actionable business insights.

FinShield – Digital Payment Fraud Analytics | [Link](#)

- Built a fraud analytics dashboard to detect suspicious digital payment transactions and analyze fraud trends.
- Processed transaction data using Python and MySQL, including data cleaning and risk score analysis.
- Created interactive Power BI visualizations for fraud rates, transaction patterns, payment methods, and location-wise analysis.
- Identified high-risk transactions and generated insights to support fraud prevention and risk management.

India Road Accident Analysis Dashboard | [Link](#)

- Developed an interactive Power BI dashboard to analyze **4.32M road accidents, 435K deaths, and 1.94M injuries** across India (2018–2023).
- Performed data cleaning, transformation, and modeling using **Power Query** and **DAX** to create meaningful KPIs and trends.
- Visualized accident patterns by **state, vehicle type, road type, and urban/rural areas** through maps, charts, and interactive filters.
- Identified key insights such as high accident involvement of two-wheelers, accident trends over time, and accident concentration on national highways.

Skills

- **Programming Languages:** Python, Java
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** SQL, MongoDB
- **Computer Science Fundamentals:** Object Oriented Programming, Data Structures
- **Tools:** VS Code, Git, GitHub

Certificates

- Data Science using Python – INI [NPTEL]
- Bharatiya Antariksh Hackathon 2025
- Data Analytics Job Simulation – Deloitte
- Data Science – FingerTips
- Python Bootcamp – Udemy
- Python – GUVI
